# Highlights

## Diffuse light effect

The Philips Hue Lightstrip Outdoor offers perfect diffused light for direct and indirect lighting solutions. Thanks to the diffuse coating you do not need to hide the lightstrip from plain sight; the light is mixed inside the strip, emitting one uniform colour on the outside.

## Flexible installation

Easily bend and shape the Philips Hue Lightstrip Outdoor to suit your needs. Place it into the ground to highlight your pathway, or apply it with the included clips and screws to any surface for ceiling or wall lighting; the possibilities are endless.

## Weather-proof

The Philips Hue Lightstrip Outdoor is fully weatherproof, meaning that it can withstand all

weather conditions. The lightstrip can withstand small puddles of water and jets of water from any direction, so no need to worry when the rain comes!

## Warm to cool white light

Extend your evenings with Philips Hue outdoor lighting. Set the right ambience on your patio, balcony or porch and relax. From the warm white light of a summer sun, to the ice cool daylight of winter: you can enjoy any shade of white light to fit your mood throughout the year.

## Requires a Philips Hue bridge

Connect your Philips Hue lights with the Bridge to control your lights from your smart phone or tablet via the Philips Hue app. Or control your Philips Hue lights with the Philips Hue dimmer indoor switch for on/off and dimming functionalities.

## Welcome you home

Experience the comfort of your lights turning on automatically when you arrive and turning off when you leave. Unload your car, enter your house, all with the comfort of the right light. Either use the Philips Hue outdoor sensor, or set the Hue app to Home or Away mode to switch on all your lights, or let geolocation do it for you, all without touching a button. It's as easy as that.

## Smart control, home and away

Light up your outdoors and see what's going on outside. By connecting your outdoor lights with the Hue Bridge you can control them in any way you like. With the Philips Hue outdoor sensor, our indoor remote control options, such as the Philips Hue app or using your voice (Amazon Alexa, Apple HomeKit or Google Assistant), you can control your outdoor lights. You can set light schedules to mimic your presence. Control your outdoor lighting from the comfort of your home or from any other location.
